## THE THREAT IS REAL

Cyber attackers want in. The threat to your company's IT security is real, it's imminent, and it's growing.

There are many ways to breach corporate defenses, but web applications are by far the most vulnerable part of your network. Only constant scanning and ruthless control can help you find vulnerabilities before anyone does.

That's where F-Secure Radar comes in.

# POWERFUL, SCALABLE VULNERABILITY MANAGEMENT

F-Secure Radar is a sophisticated, enterprise-grade vulnerability scanning and management solution that gives you the tools you need to control and manage IT security risk. F-Secure Radar helps medium-sized and large enterprises to identify and remediate known vulnerabilities in any platform or web application.

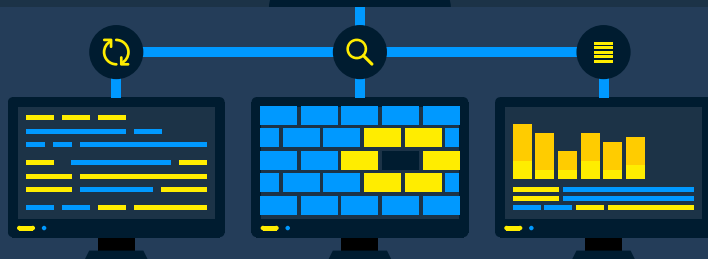

# THOUSANDS OF VULNERABILITIES ONE WAY TO MANAGE THEM

F-Secure Radar vulnerability scanning and management consists of sophisticated platform and web scanning engines. These are paired with a powerful, easy-to-use, web-based vulnerability management and reporting platform—with third party integration capabilities through F-Secure Radar API.

F-Secure Radar comes with a flexible licensing scheme and allows unlimited scans. Clients that have found F-Secure Radar a good fit include financial, gaming and service providers, as well as leading global brands.

# COMPLETE THREAT MANAGEMENT

F-Secure Radar detects weaknesses and threats immediately, boosting network and application security and ensuring regulatory compliance. Unparalleled central reporting and in-depth analysis improve security management.

## **Get the big picture**

Map all system assets for a complete security overview. No system is too big—F-Secure Radar scales as you grow.

## **Streamlined security management**

Monitor vulnerabilities efficiently with automated, scheduled scans. Assign, manage and track all security issues in coordination with system administrators, developers, auditors and more.

## **Customized reporting made simple**

Customize and automate standardized reports for all audiences in a variety of formats.

## **Continuous improvement**

F-Secure Radar is automatically updated, improved, and ready for seamless third party integration through F-Secure Radar API.

## **Local presence, EU compliance**

Benefit from local F-Secure support in the Nordic countries, Germany and France. F-Secure Radar meets EU regulations with PCI ASV vulnerability scanning compliance.

## **F-Secure Radar your way**

Run vulnerability scans from a secure cloud-based SaaS or as an on-site solution behind your corporate firewall.

# THE FIRST NAME IN VULNERABILITY SCANNING

F-Secure Radar can offer unparalleled vulnerability scanning thanks to robust, always up-to-date scanning engines and an intuitive management dashboard.

## **F-Secure Radar Security Center**

F-Secure Radar Security Center is your dashboard for all reporting, vulnerability management, and incident remediation. Here you can control, assign, follow and manage all security issues. Streamline workflows, automate scans and deliver detailed, standardized or custom-tailored reports.

## **Discovery Scan**

Fast network host discovery and asynchronous port scanning help you identify assets for security vulnerability scanning and monitor network changes. Discovery Scan supports service and OS detection and adjusts scan speed to suit network capacity.

## **System Scan**

Platform scanning aids in identifying publicly known security vulnerabilities, configuration errors, improper patch management, implementation oversights and more. System Scan checks any network device that talks IP, delivering high accuracy with low false positives and negatives.

## **Web Scan**

Web application scanning detects security vulnerabilities within commercial and custom-built web applications. Test for numerous vulnerabilities, including the OWASP Top 10. Web Scan is scalable, enabling limitless web application scanning.

# ENSURE BEST PRACTICES WITH MANAGED SERVICES

F-Secure Radar Managed Services help companies to get the most from their vulnerability scanning and management solution. You get service tailored to your specific needs and can be sure that you are following best practices. You can focus your efforts on your core business while experts take care of vulnerability management.

F-Secure Radar Managed Services helps companies in three ways:

- Outsourced management of your F-Secure Radar Security Center and its scans
- Vulnerability management handled by experts with direct contact to your system owners
- Regular reports and status meetings targeting your IT team and stakeholders
